Neighborhood Walkability Measure

A lot of people are very dependent on a car these days to get where they want to go. If you or another family member wanted to, which of the following could you walk to without too much trouble?

Tick all you could walk to without too much trouble:

1. A local corner shop/newsagent
2. A church
3. A park (or pitch)
4. A local school
5. A Community Centre or Recreation Centre
6. A crèche (or childcare facility)
7. A chemist (or pharmacy)
8. A pub
9. The place that I work
10. None of the above. It is hard to really go anywhere without a car

Please assign a neighborhood walkability score ranging from 0 (cannot walk to any of the places mentioned) to 9 (can walk to all of them).
